

LABVIEW DESIGN & APPLICATIONS

SHOWCASE & INDUSTRY MEET

The Course is designed to prepare the students to develop, debug, and test LabVIEW VIs, solve multi-disciplinary problems using LabVIEW, use data acquisition, and perform signal processing and instrument control in LabVIEW applications.

HANDS-ON DESIGN
Open to Students
from All Majors

FEATURING

- Course and Hands-on Curriculum
- Student Presentations
- Interface LabVIEW with Arduino and Raspberry Pi
- Control Test Equipments Using LabVIEW

**EE @ Sonoma
State University**
Thursdays 1-3:50 pm
Sign up for EE 486.4
One-Unit Elective Lab

INDUSTRY INVITATION

The Electrical Engineering Department invites members of industry to present at this event to show students industry applications of LabVIEW and the relevance of their course experience to the workforce. The showcase and industry meet serves as a good recruitment platform to find students with LabVIEW experience.
