

## First Meeting in Spring – ES 493

Our first group meeting will be in (the first week of classes). **EVERYONE** is required to attend the class! We will do the following:

0- Review the course schedule - the instructor will give you the schedule for the rest of the semester.

1- Give an update about your project - We will go around and get an update about each project. Your progress report must match up with your Gantt Chart in your report. This counts as FIVE percent of your overall grade for ES 493.

2- Submit your report in Latex - Each group must **submit a Latex Version** of its project report. This counts as FIVE percent of your overall grade for ES 493.

Remember: You already have your report; you just have to convert it to Latex. **Please use Project Template:** <https://www.overleaf.com/3753413ndqqhf#/10756895/> You can download the entire project. Go through the template and make sure you understand how tables, equations, figures, and references are coded. Here are some useful links:
