Motivation

- **Commercially available weight monitoring systems are expensive and lack flexibility**
- **Our design focuses on**
 - Low-Cost**
 - Flexibility**
 - Ease-of-use**
 - Open-source-software**
 - Real-time measurements**

Why Remote Weight Watcher?

- Among U.S. residents ages 65 years & older, 10.9 million, **had diabetes** in 2010 [1]
- The most recent annual data from the Census Bureau reports that 7.5 million senior women and 2.6 million senior men **live alone** [2]
- In **Sonoma county** of those over 65, one in 2.4 was living alone (41.7%) [3]

Weight Watching is a Major Issue for Senior Citizens Who Have Diabetes & Are Living Alone!

Facts of Diabetes in the U.S.

**Diabetes affects 25.8 million people of all ages
8.3 percent of the U.S. population**

DIAGNOSED
18.8 million people

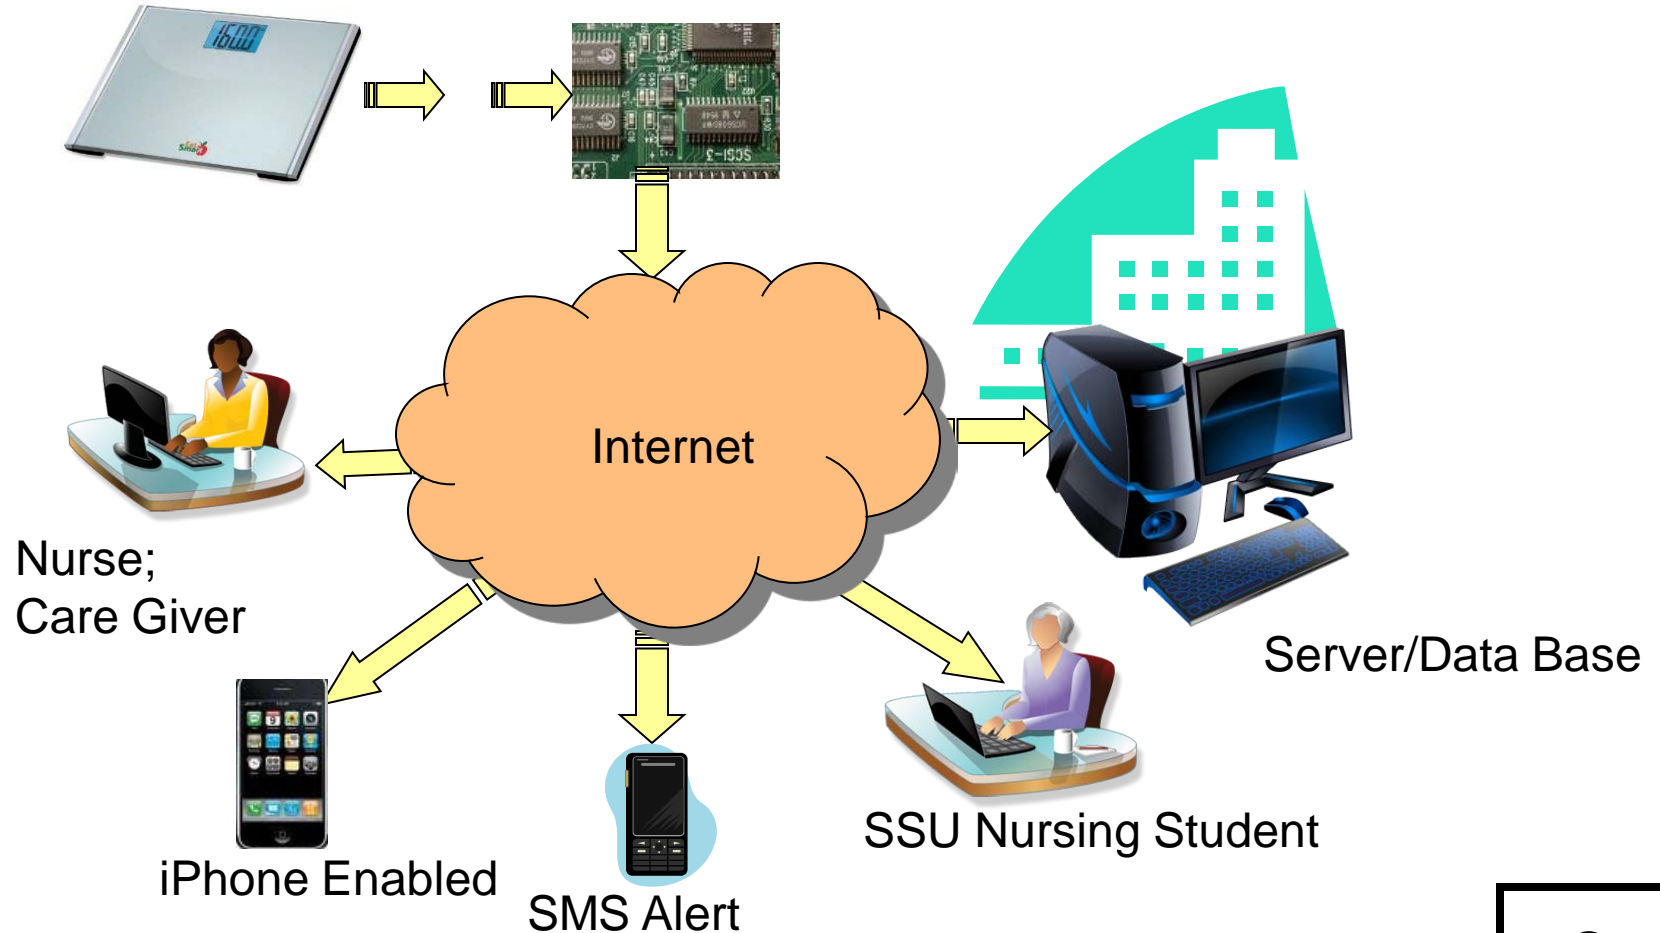

UNDIAGNOSED
7.0 million people

Our Design Features

- Affordable for any small clinic and hospital
- Easily configurable
- Open source libraries and tools
- Web-enabled and completely accessible by remote users
- Highly reliable
- Based on off-shelf components

Low-Cost Remote Weight Watcher System

Remote Weight Monitoring

Remote Weight Watcher

- Developed by the Department of Engineering Science at Sonoma State University
- **Allows remote patient weight monitoring**
- Low-cost and requires minimum hardware modifications
- **Simple to use**

ENGINEERING SCIENCE

Capabilities

- Based on LabVIEW software
- User-friendly
- Configurable environment
- Allows collaboration among users
- Cost-efficient and flexible

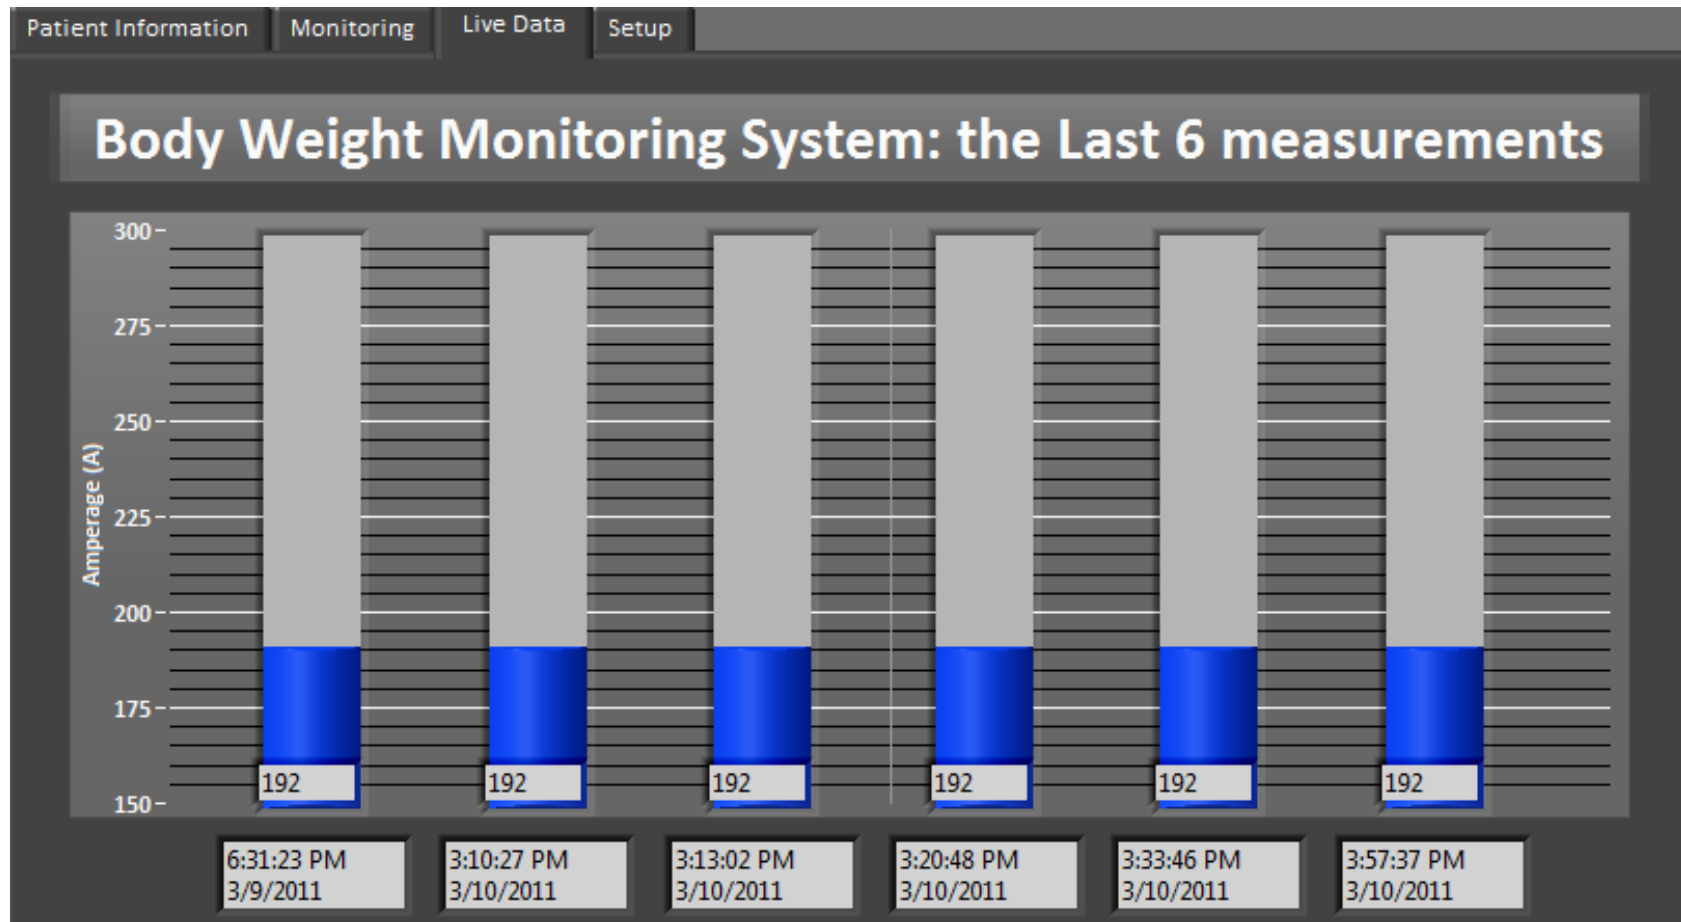

Architecture

User Interface

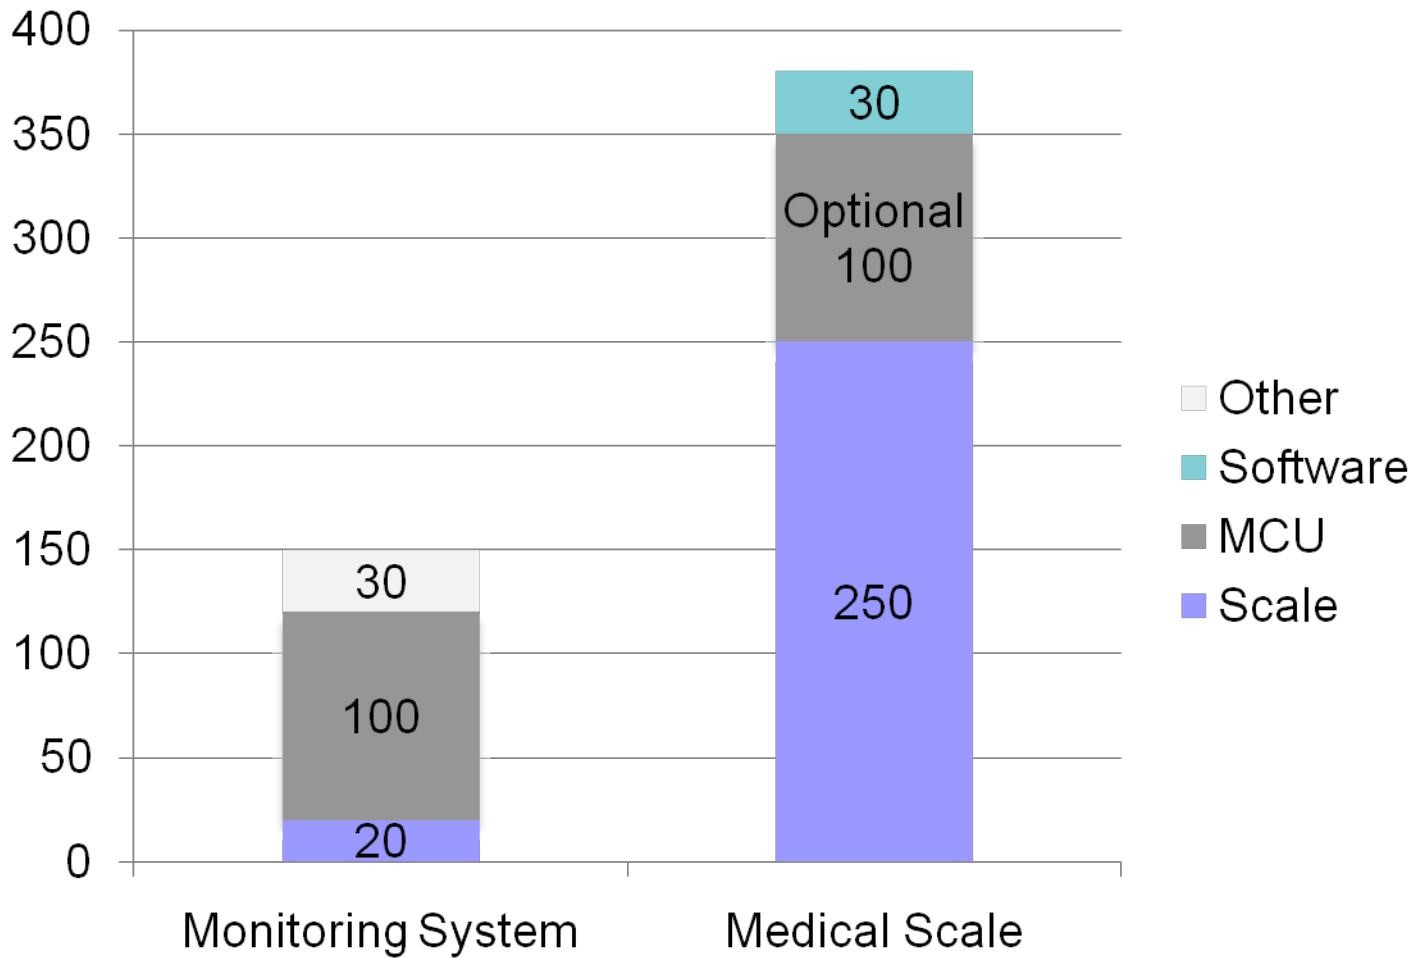

User Interface

Comparison

	Body Weight Monitoring System	Medical Scale
High Accuracy	✓ ✓	✓ ✓ ✓
Cost	✓ ✓ ✓	✓
Output	✓ ✓ ✓ Serial & Ethernet	✓ ✓ Serial
Easy-to-use	✓ ✓ ✓	 ✓ Connection to PC required to update data
Data Management	✓ ✓ ✓ Manage data from multiple users on a server	✓
Customized Software	✓ ✓ ✓	✓ You can't change it

Cost Comparison

Future Works

- Add Email and alert function to the Labview program
- Allow the patient and the doctor exchange opinions
- Enable logging to add privacy
- Develop an algorithm to detect inconsistent or duplicated data
- Enhance this system to work with low-speed connection
- Collaborate with users from different departments
